Volume 274 **CONTENTS** 10 September 1994

Active vorticity control in a shear flow using a flapping foil. R. GOPALKRISHNAN, M. S. TRIANTAFYLLOU, G. S. TRIANTAFYLLOU and D. BARRETT *page* 1

Pattern formation of granules on the bottom of a differentially rotating tank. P. J. THOMAS 23

Dynamics of vortical structures in a homogeneous shear flow. SHIGEO KIDA and MITSURU TANAKA 43

The hydraulic jump in a viscous laminar flow. F. J. HIGUERA 69

Electrohydrodynamic stability of a slightly viscous jet. A. J. MESTEL 93

Finite-size effects in forced two-dimensional turbulence. LESLIE M. SMITH and VICTOR YAKHOT 115

Resonantly generated internal waves in a contraction. S. R. CLARKE and R. H. J. GRIMSHAW 139

Hypersonic boundary-layer separation on a cold wall. R. M. KERIMBEKOV, A. I. RUBAN and J. D. A. WALKER 163

Dynamics of a drop in a constricted capillary tube. T. M. TSAI and MICHAEL J. MIKSIS 197

Tidal excitation of hydromagnetic waves and their damping in the Earth. R. R. KERSWELL 219

The effect of spanwise system rotation on Dean vortices. O. JOHN E. MATSSON and P. HENRIK ALFREDSSON 243

Applications of exact solutions to the Navier–Stokes equations: free shear layers. ERIC VARLEY and BRIAN R. SEYMOUR 267

The asymptotic study of dissipation and breakdown of a wing-tip vortex. V. N. TRIGUB, A. B. BLOKHIN and I. N. SIMAKIN 293

Steep solitary waves in water of finite depth with constant vorticity. J.-M. VANDEN-BROECK 339

Shock waves in dilute bubbly liquids. M. WATANABE and A. PROSPERETTI 349

Spin-up of a rapidly rotating heavy gas in a thermally insulated annulus. INGEMAR A. A. LINDBLAD, FRITZ H. BARK and SAID ZAHRAI 383

CORRIGENDA 405

REVIEWS

Simulating Nearshore Environments, by P. A. Martinez and J. W. Harbaugh 406

Mathematical Methods in Fluid Mechanics, by M. Feistauer 406

SHORTER NOTICES 408

INDEX TO VOLUME 274 410

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 411
